EXPERIENCE

GAME DEVELOPER

PERSONAL PROJECT

- Developed a 2D side-scrolling platformer game using python and pygame with animated sprites, collision detection and custom obstacles and platforms

EDUCATION

EXPECTED IN 2027

BACHELOR OF SCIENCE

SOFTWARE
ENGINEERING | BELGIUM
CAMPUS ITVERSITY | CAPE
TOWN,SOUTH AFRICA

- Integrated physics-based jumping, and responsive controls.

FULL-STACK DEVELOPER

PERSONAL PROJECT

Currently busy developing a multi-tenant e-commerce platform with subdomain support for vendor-specific storefronts that uses integrated **Stripe Connect** for payments and automated platform fees

Key features:

- Role-based access control (admin, merchant, buyer)
- Product ratings & reviews, category filtering, and keyword search
- Admin and merchant dashboards
- Payload CMS for backend management
- Image uploads and buyer purchase libraries

This project will be built with **Next.js 15**, **TailwindCSS v4**, and **ShadcnUI**.

SOFTWARE DEVELOPER

PERSONAL PROJECT

Employee Management System using Blazor WebAssembly, .NET, EF Core

Planned for : August 2025

- Designing a web-based system for managing employee data, leave applications, and performance evaluations.
- Planned features include role-based dashboards, secure login/authentication, and CRUD operations.
- Will use **Blazor WebAssembly** for the frontend, **Entity Framework Core** for data access, and **SQL Server** for database management.
- Focused on building a scalable and secure internal HR tool for small to medium businesses.
